

Isaac and his friends were sitting on a deck and eating sunflower seeds. Each person had a bowl with the same amount of seeds. The graphs below all show the amount of sunflower seeds remaining in the person's bowl over a period of time.

Write sentences that describe what may have happened for each person.

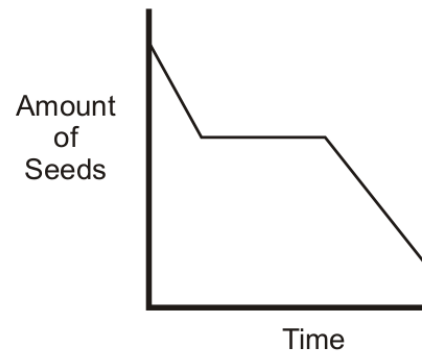

A.

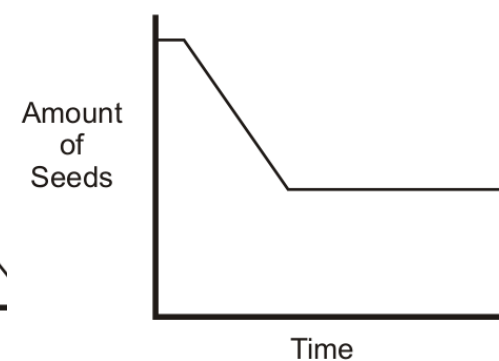

B.

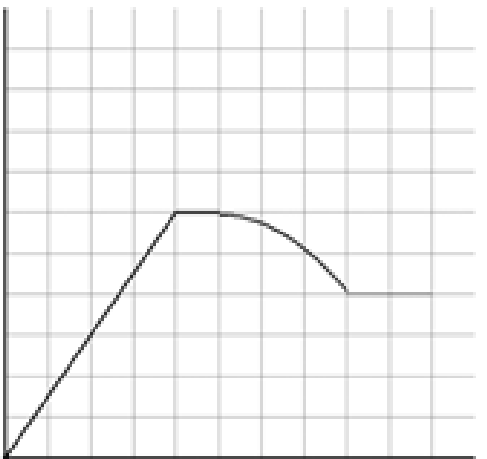

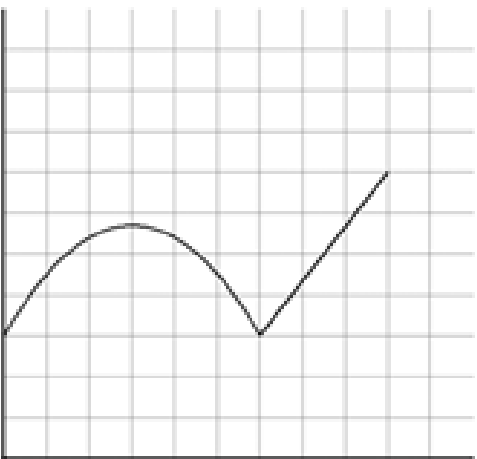

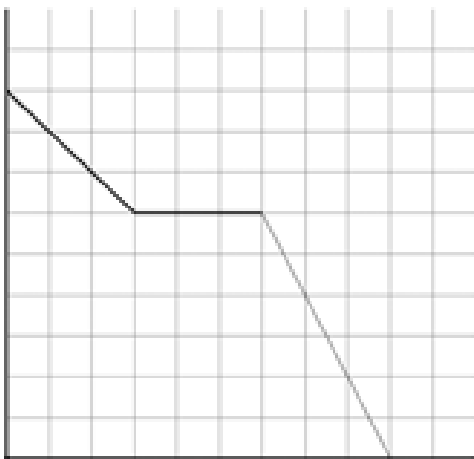

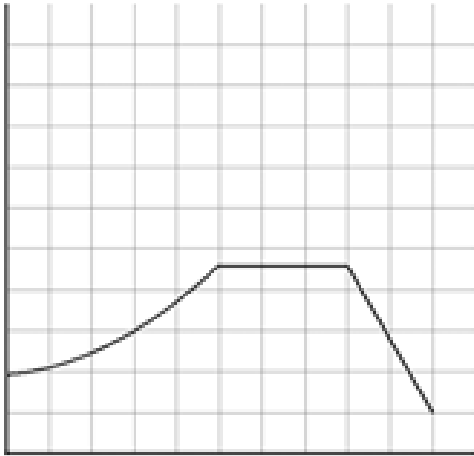

C.

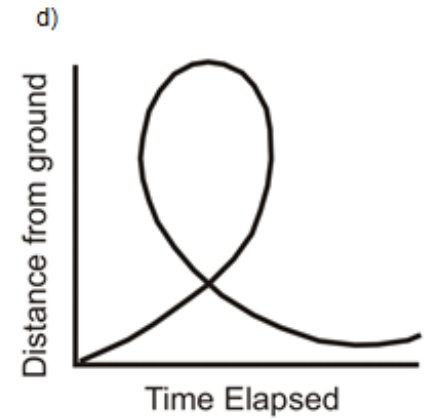

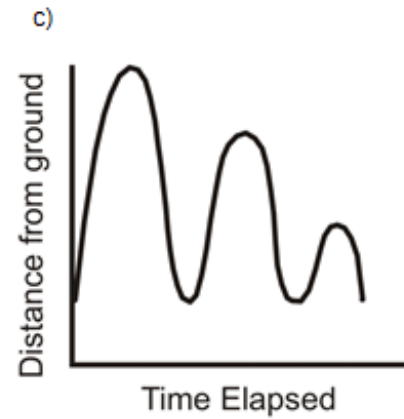

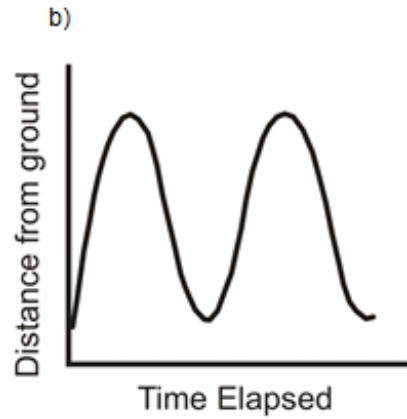

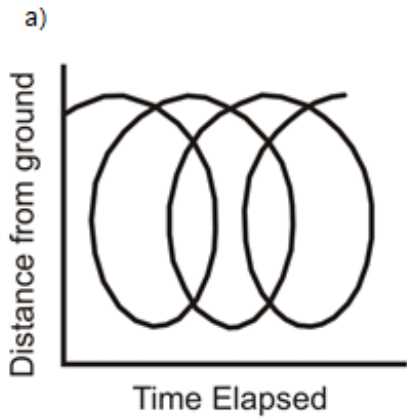

D.

Tell a story about each graph if the y-axis shows the number of gallons of water in a pool and the x-axis measures the time.

1. A bicycle valve's distance from the ground as a boy rides at a constant speed.

2. A child swings on a swing, as a parent watches from the front of the swing.
