

Clearing the Memory of the TI-84 Graphing Calculator

When beginning a new lesson with the calculator it is sometimes helpful to RESET the memory of the calculator. This will reset the calculator back to the condition it was when it was taken out of the package for the first time. Warning: All programs will be cleared.

Turn the calculator ON

Press 2nd Mem (0)

```
MEM0000
1:About
2:Mem Mgmt/Del...
3:Clear Entries
4:ClrAllLists
5:Archive
6:UnArchive
7:Reset...
```

Select 7: Reset by

- pressing 7 or
- using the cursor arrows to move to 7 and ENTER

```
RAM ARCHIVE ALL
1:All RAM...
2:Defaults...
```

Select 1. All Ram by pressing

- 1 or
- ENTER

```
RESET RAM
1:No
2:Reset

Resetting RAM
erases all data
and programs
from RAM.
```

Select 2. Reset by pressing

- 2 or
- ENTER

You will get the screen at the right that tells you the RAM has been cleared.

```
TI-84 Plus Silver Edition
2.21

RAM cleared
```

You now have a calculator that is set up just like when you got it out of the package.
