

Activity 5

- The Tasty Tangram Company has recently opened throughout the US. They sell brownies in the shape of the 7 tangram pieces.
- Create a set of directions which will help the employees put the seven shapes of brownies together to form the tangram square.
- Other groups can put the directions to the test by following the directions.
- If the owner of Tasty Tangram franchises decides she will charge \$1 for the small right triangle shape brownie, and all the other shapes will be charged proportionately, how much will she charge for each of the other pieces and how much will the entire brownie tangram cost?
